Art Unit: 1646

Claims 1 to 36 are pending in the instant application.

Claims 1 to 36 are generic to a plurality of disclosed patentably distinct species of candidate receptor as represented by SEQ ID NOs:2 to 87, for example, a plurality of disclosed patentably distinct species of G protein as listed in claims 9 and 25, a plurality of disclosed patentably distinct species of response element as listed in claim 28, and a plurality of disclosed patentably distinct species of reporter gene as listed in claim 23. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of receptor, G protein, response element and reporter gene, even though this requirement is traversed.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the
